

Heavier, single monitors for desktop display require strong, reliable support. The modular Tetra Support System (TSS) of columns, monitor arms, and accessories offers a flexible solution that securely holds heavy monitors.

The TSS XL is specifically designed for larger screens. The XL includes the TSS support car-

riage 32 and a 21.46" TSS column with a grommet tabletop mount where cables can fit down through the desktop. Designed with larger mounting standards, the strong metal mount will hold up to 44 pounds. Adjustable for height and side-to-side monitor tilt with cable clips to ensure an organized appearance.

Item Number	Height	Base Option	Capacity	Range
220+0110+000	21.46"	Grommet	44 lbs	2.52"
